## PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 5+ years shipping production software end-to-end across **Vue.js (Vue 3 + Nuxt 3)** and **React (React 19 + Next.js)** on **TypeScript, NestJS, Laravel, and PostgreSQL**. Founded and operates a live multi-tenant ERP — 55+ modules, a separate database per customer, 99.9% uptime on blue-green Docker deploys. Published a Vue 3 component to npm, shipped regulated UAE fintech with KYC/AML, and built AI-agent systems with **LLM tool-calling and multi-provider routing**. Owns the full lifecycle — data modeling, REST / GraphQL APIs, UI, CI/CD, and Dockerized VPS administration — and mentors junior developers.

## CORE TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | TypeScript, JavaScript (ES2024), PHP 8, SQL |
| **Frontend** | **Vue.js 3, Nuxt 3, Pinia, Vite, PrimeVue, shadcn-vue / reka-ui, React 19, Next.js (App Router), Tailwind CSS, TanStack Query**, React Native / Expo |
| **Backend** | Node.js, **NestJS 11, Laravel 12 (Octane)**, REST APIs, GraphQL, WebSockets (Reverb / socket.io), tRPC, BullMQ |
| **Databases** | **PostgreSQL (Supabase + self-hosted)**, MySQL, Redis, MongoDB |
| **AI integration** | Vercel AI SDK, LangChain JS + LangGraph, tool-calling, streaming SSE, multi-provider routing (OpenAI, Anthropic, Gemini), pgvector |
| **UI / UX** | Figma, Atomic Design, Storybook, design systems, web accessibility (a11y), responsive + RTL design |
| **Testing & Performance** | Lighthouse audits, k6 load testing, Playwright E2E, Sentry error monitoring, cross-browser QA |
| **DevOps & Servers** | **Git / GitHub, Docker, CI/CD, blue-green deploys on VPS, Caddy, Cloudflare**, Vercel, Railway, monorepos (Turborepo / pnpm) |
| **Documentation** | OpenAPI, flowcharts, state-machine diagrams, ERD / data models, sequence diagrams |
| **Security** | OWASP Top 10, OAuth2 / OIDC, JWT, RLS, KYC/AML (Sumsub), Cloudflare WAF, input validation, rate limiting |

## SELECTED PROJECTS

### Manifest ERP (Prolink) — Multi-Tenant Manufacturing ERP · Founder · Live production

NestJS 11 · TypeORM · **PostgreSQL (database-per-tenant)** · React 19 · Docker · Caddy · blue-green deploy on VPS · AI SDK

- Founded Prolink and built Manifest end-to-end: ~157k LOC of TypeScript, 55+ feature modules, 125+ DB entities, used daily by Egyptian manufacturers and exporters.
- Architected **true database-per-tenant isolation** with request-scoped tenant resolution at the request layer.
- **Administered production web servers**: Dockerized VPS, blue-green zero-downtime releases behind Caddy, 99.9% uptime, CI/CD pipelines.
- Drove code reviews and mentored two junior engineers through structured PR feedback and pairing.

### Aqd Ejar — Vue 3 SaaS for Saudi Real-Estate · Gov-integrated

Vue 3 · Vite · Pinia · **PrimeVue 4** · **Tailwind CSS** · Vee-Validate + Yup · Pusher-js · Sentry · PostHog · Laravel 10 (Octane) · **PostgreSQL** · Redis

- Designed and shipped a multi-route Vue 3 SPA (Office Dashboard, Owner Portal, public PropertyQR) connected to a Laravel REST backend; structured **Pinia** stores for offices, contracts, parties, and realtime inbox.
- Extracted and published **vue-hijri-gregorian-datepicker** to npm — bilingual (AR/EN), touch-optimized, used in production by the app.
- Integrated the Saudi government **Ejar** API and **Nafath** national-ID verification end-to-end across forms, validation, and signature flows.

### Mesej — WhatsApp Business + AI Agents SaaS · Polyglot architecture

**Nuxt 3** · **Vue 3** · **TypeScript** · Pinia · shadcn-nuxt / reka-ui · **Tailwind v4** · @nuxtjs/i18n · Echo + Pusher · Laravel 12 · Expo · Node.js · **PostgreSQL**

- Built the Nuxt 3 + TypeScript web client (shared inbox, AI agent UI, visual flow builder, broadcast composer) on a Tailwind v4 design system with full RTL / Arabic support.
- Designed the **AI agent v2** runtime: server-side ChatAgent with 12 typed tools over **streaming SSE**, with model-agnostic routing across Gemini, OpenAI, and Anthropic.
- Visual flow engine with explicit **state-machine semantics** per node (start, condition, action, wait, branch) backed by FlowExecution records.

### BrixFund — UAE Fractional Real-Estate Fintech · Regulated

Next.js 16 · TypeScript · **Supabase (Postgres, Auth, RLS, Edge Functions, Storage, Realtime)** · Tailwind · Stripe · Sumsub KYC/AML · BullMQ · Cloudflare WAF · k6

- Modeled the investment domain in PostgreSQL with **Row-Level Security** policies covering every read / write path; Stripe fiat rails and BullMQ dividend-payout workers.
- Wrote OpenAPI specs (generated from Zod validators) and **load-tested critical endpoints with k6** to size storage, bandwidth, and compute cost before launch.
- Security-hardened: Sumsub KYC/AML, Sentry telemetry, Cloudflare WAF rules, secret rotation, audit logs.

### TRAXON — AI Trading Agents · TypeScript monorepo

**TypeScript** · Turborepo · Next.js 16 · NestJS · tRPC · BullMQ · Expo · **PostgreSQL + Drizzle (26 tables)** · LangGraph + LangChain

- Built a typed TypeScript monorepo — Next.js web, NestJS worker, Expo mobile — sharing a 26-table Drizzle schema.
- LangGraph agents execute plain-markdown trading strategies across Binance, Aster DEX, and ccxt exchanges; multi-LLM routing and metered Stripe billing.

## PROFESSIONAL EXPERIENCE

### Founder · Full-Stack Engineer

2025 – Present

**Prolink (Manifest ERP)**

Egypt

- Founded Prolink to build and operate Manifest — a multi-tenant ERP for Egyptian manufacturing and export companies. Architecture, infrastructure, and shipping — solo.

### Senior Full-Stack Engineer
2024 – Present

**Domais**
Saudi Arabia · Remote

- Delivered branded web products and admin tooling across a portfolio of client projects (Mesej, Aqd Ejar, Amiral, Masajed) on **Laravel (Octane) + Nuxt 3 / Vue** and Next.js stacks — Arabic-first UIs, Hijri-aware inputs, government API integrations.
- Refactored a legacy monolith with modern tooling, lifting Lighthouse performance from 60 to 90+.
- Built realtime sync over **WebSockets** with **Pinia** state choreography for high-concurrency inboxes; owned Docker + CI/CD for zero-downtime deploys.

### Senior Frontend Developer
2024 – 2025

**Lexmodo**
Remote

- Standardized the frontend on **Vue.js** with a shared component library; eliminated state-management bottlenecks against high-frequency REST APIs.

### Lead Frontend Engineer (Sole Developer)
2022 – 2024

**Riadiat SA**
Remote

- Led end-to-end client-side architecture for a multi-module enterprise web app from scratch on **Vue.js + Pinia**; built a reusable **Atomic Design** component library with Storybook (new-module UI time −30%, dashboard initial-load −25%).

### Web Developer
2021 – 2022

**Scandiweb**
Remote

- Shipped responsive e-commerce frontends on Magento 2 with strict cross-browser + a11y standards in Agile, Git-based, Dockerized workflows.

## EDUCATION & CONTINUOUS LEARNING

- Self-directed deep work across modern Vue, React, and applied LLM systems; active OSS maintainer: **vue-hijri-gregorian-datepicker** on npm.

## LANGUAGES

**Arabic** — Native  **English** — Professional working proficiency
